## The latest trend in jewelries.....

Posted by sanjeewa\_daniel - 2009/06/05 11:37

---

Hey! What's up!

I am quite surprised when i go through the latest trend of jewelries.It's constantly changing.There is no surety of consistency in particular design,pattern or material like gold,platinum,diamond etc.

Every one wants to go along with trendy and fancy look.And now a days diamond ring,platinum bracelets are in more fashion.

I want to know your favorite jewelries so that we can share the good designs.

Thank you in Advance

Hello

Trends influence engagement rings designs as much as they do every other aspect of our life. Classic solitaires can be as cutting-edge as they are traditional. Celebrity rings, designer rings and advances in jewelry manufacturing mean that this most traditional of purchases need not necessarily be the most traditional of jewels. celebrity engagement rings, designer jewelry, and new, unique styles. To help guide you along, here are some of the hot engagement ring trends that have emerged so far this year:

Something new. Sleek, modern, often geometric designs have done well with brides looking to stand out from the crowd. Cutting-edge fashions include settings such as tension and bezel ; newer cuts like the Zales Diamond and the Tiffany Lucida, which display more facets than traditional cuts to increase the stone's fire; and alternative shapes like the princess-cut (modified square), which offer the bride-to-be more individuality than the more traditional round, marquise, emerald, pear, or oval shapes.

Something classic. Regardless of the latest trends, timeless, classic-looking rings will never go out of style. But sometimes, a new style becomes so pervasive, that it becomes a modern classic.

Something blue . Adding a splash of color to their engagement ring is another way that some of today's brides are expressing themselves. Some are selecting colored diamonds in yellow, pink, blue, green and other shades. Others are turning to alternative gems as the center stone or as an accent to the center diamond.

Something old. Family heirlooms handed down from mothers/grandmothers, rings from estates and auctions, and pieces from vintage jewelers have been doing particularly well. In general, antique styles and cuts -- especially when set in platinum -- have been strong sellers with today's brides. Some say this is a direct result of the tragic events of Sept.

Do-it-yourself (DIY) Jewelry may be replacing diamonds as a girl's best friend. One of the hottest trends in fashion today is DIY jewelry, which often involves stringing together colorful shiny beads made of glass, crystal, acrylic, Mother of Pearl, Chinese cloisonné, silver, non-precious metals such as copper and nickel, and a wide range of other materials.

The appeal of DIY jewelry is clear. One-of-a-kind custom jewelry pieces can be created to fit any woman's unique style and preferences – or given to friends and family as a distinctive gift – and at a much lower cost than purchasing pieces off the rack at the jewelry counter. DIY jewelry is cheap, it's easy, and maybe most importantly it's fun.

Jewelry vendors will be wise to get behind this growing trend and stock multiple beads for jewelry DIYers, offering a variety of styles and colors for customers to choose from.

Hi

Recently i bought some Thomas sabo jewelry from Steffans in UK ... In that shop, the Sterling Silver Collection from THOMAS SABO Jewellery always offers the perfect accessory for current fashion trends. With a special sensitivity for Sterling silver, with the utmost eye for detail and a total flair for design and trends.. steffans is one of World's foremost jewelers having an exquisite range of traditional and modern jewellery in gold ,platinum, and other metals ...This is one of the most preferred online shop for jewellery. ...

As the trend of the fashion is changing according to that the people will also change according to that, it's common now-a-days.Platinum deserves the place now in fashion. Obviously I too love a simple platinum chain with a heart locket. :)
