
Want to be a Radiant, Fair, Glowing Bride?

Posted by sloopy72 - 2008/09/04 20:06

Erase pigmentation, freckles, embarrassing discolourations, dark underarms, age spots. All they will see is the radiant, fair bride!

Completely natural and simple - no nonsense (real people, real pictures, real stories). Affordable too!

Click (or copy and paste) this link for more info:

have fun all day and when you guys want to have sex, go back to your room and have sex or don't go back to your room and have sex anyway. Just like any other time, when you want it do it. Have fun and explore too, it's vacation. you will feel like doing something else besides having sex... don't schedule it.

Hello

1. Use heavy-pigmented cream foundation and layer it with powder foundation to make the skin look smoother.
2. Use powder foundation on neck, ears and chest too so that you don't seem to have a painted face.
3. Use a concealer shade similar to the foundation and blend both well.
4. Learn some camouflage makeup tricks and buy its products to use on your big day.
5. If you have combination skin, use water based foundation and a dry sponge.
6. Hide the under eye circles by applying concealer. Blend it towards the nose and use downward strokes.
7. For a perfect eye shape, use a small brush to blend a medium tone color from just below the brow arch downwards in a semi-circle motion.
8. Use light peach eye shadow as eyelid base.
9. Choose lip liner that blends easily with lipstick for that soft glossy look that looks good in photographs too.
10. Place the focus on the face either on eyes or on lip and underplay the other with neutral pink or brown shades.
11. Thin and small lips look more sensuous with light lip colors while fuller lips can use deep shades.

First, apply just a touch of moisturizer on your wedding day, says international makeup artist Kristofer Buckle. "Makeup doesn't adhere as well to an oil base on the skin." After that, it's all about choosing products with powder formulations, which are known for their terrific staying power. Start with translucent powder brushed on over your foundation. Next, choose a powder eye shadow and liner applied with a brush (instead of a greasy pencil). Long-wearing lipstick completes the look.

During the pre wedding days, you are so preoccupied with so many things, that you neglect your food and sleep, which not only harms your health but also affects your skin. If you find your skin looking dull and stressed, it means either you are not having proper diet or sleep. So in order to look fresh and vibrant it is important you take proper care of your skin. Here are some dos and don'..
